SUBJECT: Notification of new meter equipment installation.

Dear Water Customer:

As you may know, currently The Village of Bellaire Department of Public Works staff have been reading water meters with a handheld reader while walking from house to house. The Village has received new equipment to read this information from a vehicle via radio reader. The DPW staff members will be installing this new radio read equipment for water meters in the next few weeks. With the new reading equipment, our DPW staff will be able to collect this information while driving around the Village and focus their time elsewhere in maintaining our community.

Why are you receiving this letter?

In order to install this equipment a DPW staff member may need access to the inside of your home for the equipment change necessary for a proper reading for your account. We will need you to call the office at **231-533-8213** to schedule a time that you will be available to allow our staff in your home. This should only take about 15 minutes.

While installing this new equipment, our staff will also be able to inventory the service lines inside your home to help determine if your water service line is made of lead.

Please contact the Village of Bellaire offices at 231-533-8213, or the Department of Public Works garage at 231-533-6414 if you have any questions regarding this letter.
